Description

Screenprint

Print technology for which the printing plate is a template.

Onto this template a close meshed fabric is put and through this fabric the colour is transferred onto the print area of the bauble.

What is possible:

- Simple logos or text
- Only 1-colour
- Around-the-bauble printing possible
- 3D print, which means that the print is highlighted with glitter

Padprint

A silicone pad takes the motive from a low pressure printing plate and "print" it on the bauble

(like a stamp). Because of rapid drying of the colours it is possible to print up to 5 colours consecutively and on top of each colour.

What is possible:

- High precision of the print
- Simple logos text up to detailed pictures one-coloured or 4-5 coloured.
- Printing only possible at one side of the bauble and/or at two sides
